

The ForrestBar

Table of contents

1 What's the Forrestbar?.....	2
2 Installing the Forrestbar.....	2

1. What's the Forrestbar?

The Forrestbar is a toolbar made for [Mozilla](#) (and [Firefox](#) compatible) that eases the navigation of Apache projects and resources, and to the local Forrest running on your machine.

2. Installing the Forrestbar

Note:

Forrestbar does not currently work with Firefox 0.9+

To install the latest nightly version brought to you by [Gump](#) in [Mozilla](#) or [Firefox](#), just [install it](#) or [download it](#) and drop it on a mozilla window.

To get the latest and greatest version run the forrestbar target of the Forrest build.
