

# Forrest DTD documentation

We use the [NekoDTD](http://www.apache.org/~andyc/neko/doc/dtd/index.html) (<http://www.apache.org/~andyc/neko/doc/dtd/index.html>) tool packaged as a Cocoon Generator to generate automatically some hyperlinked DTD references. Note that these references do not reflect the modularity of our DTDs, they are primarily "user-oriented help" documentation.

There exists generated documentation for:

- [document-v13](#) (document-v13.dtdx.html)
- [howto-v13](#) (howto-v13.dtdx.html)
- [faq-v13](#) (faq-v13.dtdx.html)

Hope this helps ;-)
