1. Version 0.3-dev (unreleased)

- Changed plugin name to conform to naming conventions. (RDG)

2. Version 0.2 (2005-02-22)

- Put Description from Excel document properties as a paragraph at the beginning of the document (js)
- Put Description from Excel document properties as a paragraph at the beginning of the document (js)
- New feature: put id=sheet name in to allow #id links (js)
- New feature: content containing .png, .gif or .jpg is displayed as image; use path below image directory (js)
- New feature: 'text' in first column to create descriptive text. (RDG) Thanks to Johannes Schaefer.
- Removed table around figures (js)
- Minor issue: captions are now included even if Excel skips cell at position three and writes weird "ss:Index=4". (RDG) Thanks to Johannes Schaefer.

3. Version 0.1 (unreleased)

- Initial plugin code. (RDG) Thanks to Johannes Schaefer. Fixes [FOR-373](#).
- Fixed bug: input.xmap pointed to the project's resources dir not the plugin's. So, plugin documentation worked fine, but any other project didn't. (RDG) Thanks to Johannes Schaefer. Fixes [FOR-432](#).
