2 med.....	2

1. high

- **[code]** Use a DTD and sourcetype action to decide when to use the RSS plugin rather than the fixed URL of "***/feeder/*" # open
- **[code]** Add a configuration to limit the number of headlines shown from each feed. # open

2. med

- **[code]** Creating a PDF can be problematic with some feeds. The content of the feed is placed into a fo:block in an unprocessed form. As a result there is HTML in the block. This seems to confuse FOP as it produces org.apache.fop.apps.FOException: internal-destination or external-destination must be specified in basic-link # open
