

Standards Compliance

Table of contents

1 Introduction.....	2
2 HTML.....	2
3 WAI.....	2
4 CSS.....	2

1. Introduction

Forrest is still quite young, so there are known issues. Standards compliance is a definite major goal. Please send patches for the Forrest stylesheets to ensure such compliance.

Note:

For your testing, use the Forrestbot-generated website at our [Zone tested](#) because that reflects the current SVN code.

2. HTML

Tested using the W3C HTML Validation Service (validator.w3.org).

The "pelt" skin validates as HTML 4.0.1

The "tigris" skin validates as HTML 4.0.1

3. WAI

See [Web Accessibility Initiative \(WAI\)](#)

"W3C WCAG - AAA Compliance" using webxact.watchfire.com

Issues ...

1. Priority 1: No errors, some warnings.
2. Priority 2: Some errors, some warnings.
3. Priority 3: Some errors, some warnings.

4. CSS

Jigsaw: jigsaw.w3.org

Issues ...

1. CSS 2: No errors, some warnings.
