1. The Forrest Community

The Forrest Project operates as a meritocracy: the more you do, the more responsibility you will obtain. This page lists all of the people who have gone the extra mile and are Committers. If you would like to get involved, the first step is to join the mailing lists.

Of course the committers are not the only people involved in the community. Thanks to the many people for their contributions of patches, assistance, ideas, and email discussion. Some are mentioned at the [changes](#) page. See how we [acknowledge](#) contributions.

Please do not send emails directly to individual developers asking for free support - see the Important Notices at the [mailing lists](#) page.

2. List of committers

List of all people who have ever been committers at Apache Forrest, sorted alphabetically.

3. Notes

Strong type denotes "Project Management Committee ([PMC](#)) member". Emphasis type denotes "emeritus PMC member". See the [ASF role definitions](#) for detailed role information.

Some people were committers prior to Forrest becoming a top-level project and so gaining a PMC. They were not around since then, so have never been on the PMC. All new committers are [encouraged](#) to be PMC members.

Committers can be as active as they choose and there is no performance pressure from the project. For those who are interested in the work that each particular committer has done, see the [acknowledgements](#) section.

All [Apache Cocoon committers](#) and [Apache Lenya committers](#) also have rights to commit to Forrest.
