

The ForrestBar

1. What's the Forrestbar?

The Forrestbar is a toolbar made for [Mozilla](#) (and [Firefox](#) compatible) that eases the navigation of Apache projects and resources, and to the local Forrest running on your machine.

2. Installing the Forrestbar

To install the latest nightly version brought to you by [Gump](#) in [Mozilla](#) or [Firefox](#), just click on the [Gump-nightly Forrestbar XPI Install link](#) or download it [from here](#) and drop it on a mozilla window.

To get the latest and greatest version run the forrestbar target of the Forrest build.
