6 [FOR-639] define terminology for the various aspects of Dispatcher	3
7 [FOR-735] Plugins are not correctly deployed in webapp mode	3
8 [FOR-742] trouble accessing unversioned plugin for a released version of Forrest, projectInfo	_
9 [FOR-241] character entities (e.g. ampersand) are expanded again for href or src attributes	3
10 [FOR-200] Locationmap for Forrest and Users	4
11 [FOR-546] Sitemap reference doc should be updated to reflect plugin architecture	4
12 [FOR-644] code-style cleanup for xml files	4
13 [FOR-666] clarify the sitemap matches etc. in FAQ about non-skinned html	4
14 [FOR-726] use locationmap in all of the plugins	5
15 [FOR-765] forrest war and classpath issues with Jetty	5
16 [FOR-901] Review the note on the home page about first forrest run and retrieving plugins network	
17 [FOR-906] locationmap documentation explain this-to-that.xsl naming convention and defaumatches	
18 [FOR-922] update all docs that explain sitemap fragments	5
19 [FOR-936] Forrest "looses" the locale when switching pages	5
20 [FOR-537] Plugin documentation sitemap references	6
21 [FOR-671] Layering error of HTML headings breaks rest of the page w/o warning	6
22 [FOR-731] empty linkmap.html document, side-effect of workaround to FOR-675	7
23 [FOR-767] Forrestbot webapp reports successful even when there are broken links	7
24 [FOR-861] Update locationmap docs for working with remote files	7
25 [FOR-635] images not reproduced in PDFs, if sources are in xdocs/images directory	7

#### Note:

These are the top 25 open issues for the next release that are scheduled in our <u>issue tracking system</u> (see <u>all</u> open issues). The listing below is regenerated on each Forrest run.

## 1. [FOR-855] verify the license situation prior to each release

#### http://issues.apache.org/jira/browse/FOR-855

# 2. [FOR-868] add relevant notes to the "Upgrading" xdoc

#### http://issues.apache.org/jira/browse/FOR-868

We need to add some notes to the upgrading\_0\*.html doc for the upcoming release. This would most easily be done after attending to <a href="https://issues.apache.org/jira/browse/FOR-865" title="Add missing entries to status.xml to generate the changes list">FOR-865</a> &quot;Add missing entries to status.xml to generate the changes list&quot;.

## 3. [FOR-865] Add missing entries to status.xml to generate the changes list

#### http://issues.apache.org/jira/browse/FOR-865

There are insufficient entries in our site-author/status.xml to generate the changes.html for the upcoming release.<br/>
| Sesides informing users of the major changes and providing cross-links to the issue tracker, this file also provides recognition of contributions ... at the moment there are too few. It also has the importance=high attribute, which generates our release announcement ... again, too few.<br/>
| Series |

### 4. [FOR-911] decide content of release

#### http://issues.apache.org/jira/browse/FOR-911

# 5. [FOR-533] Auto Generate plugins.xml entry

#### http://issues.apache.org/jira/browse/FOR-533

The information in the plugins.xml file would be better kept in the plugin directory and added to the plugins.xml file when deployed. This would reduce the amount of duplication in the plugins config files.<br/>
br/> br/> All the necessary values are now in the plugin build.xml file.<br/>
br/> This change will require that the plugins.xml file be retrieved from the build directory rather than the plugins directory when building the plugin documentation pages. We will therefore need a fall back to retrieve this file from the network if it is not currently available - this can be done with the locationmap

# 6. [FOR-639] define terminology for the various aspects of Dispatcher

http://issues.apache.org/jira/browse/FOR-639

See the email thread:<br/><a

href="http://marc.theaimsgroup.com/?t=112276643700001">http://marc.theaimsgroup.com/?t=1122766437000

# 7. [FOR-735] Plugins are not correctly deployed in webapp mode

#### http://issues.apache.org/jira/browse/FOR-735

(At this point I didn't try this scenario step by step any more; basically it is what we did to setup the site, except that we copied our project data from forrest 0.6 before trying the pdf links)<br/>
- run forrest webapp to create an empty webapp<br/>
- configure Tomcat to run the webapp (we did it by creating a context descriptor and put it onder Tomcat's config directory)<br/>
- the pdf links give an error &quot;Resource Not Found&quot;

# 8. [FOR-742] trouble accessing unversioned plugin for a released version of Forrest, e.g. projectInfo

#### http://issues.apache.org/jira/browse/FOR-742

The plugin retrieval and deployment process are not quite correct. Recently the projectInfo plugin had its version number incremented and the "unversioned" plugin now relates specifically to 0.8-dev version. That prevents 0.7 from accessing the relevant plugin.<br/>
<br/>br/> <br/>
The solution is discussed here:<br/>
<br/>
<br/>
- a

# 9. [FOR-241] character entities (e.g. ampersand) are expanded again for href or src attributes

### http://issues.apache.org/jira/browse/FOR-241

If I have a url like this inside the XML source: <br/> <a

href="http://sourceforge.net/sflogo.php?group\_id=comics-grabber&type=1">http://sourceforge.net/sflogo.php?g<br/><br/>br/> validate-xdocs fails because it wants the literal & to be typed out as<br/>br/> & typed out as<br/><br/>br/> & typed out as<br/><br/> & typed out as<br/><br/> & typed out as<br/>

So I correct it to become: <br/> <br/> <a

href="http://sourceforge.net/sflogo.php?group\_id=comics-grabber&type=1">http://sourceforge.net/sflogo.php?g<br/><br/>br/> However, the generated HTML has the entity resolution UNDONE!:<br/>br/> <a

href="http://sourceforge.net/sflogo.php?group\_id=comics-grabber&type=1">http://sourceforge.net/sflogo.php?g<br/>
<br/>
<br/>
This HTML fails validation as 4.01 transitional.<br/>
<br/>
br/> <br/>
David Crossley adds:<br/>
There is a demonstration of the problem in the document<br/>
src/documentation/content/xdocs/docs/dreams.xml<br/>
The ampersand in the link element text is

src/documentation/content/xdocs/docs/dreams.xml<br/>br/> The ampersand in the link element text is properly handled but<br/>br/> the ampersand in the link href attribute is not.

## 10. [FOR-200] Locationmap for Forrest and Users

http://issues.apache.org/jira/browse/FOR-200

The locationmap gives us the ability to specify where sources are, both for Forrest and for the users.<br/>
| Ser | Ser

# 11. [FOR-546] Sitemap reference doc should be updated to reflect plugin architecture

http://issues.apache.org/jira/browse/FOR-546

The example at <a

href="http://forrest.apache.org/0.7/docs/sitemap-ref.html#pdf">http://forrest.apache.org/0.7/docs/sitemap-re

<map:serializers&gt;<br/>

<map:serializer name=&quot;fo2pdf&quot;<br/>br/>

</map:components&gt;<br/> <br/> I found out about this because my sitemap uses the fo2pdf too (docbook to PDF), and had to add the serializer.

# 12. [FOR-644] code-style cleanup for xml files

http://issues.apache.org/jira/browse/FOR-644

We have much inconsistent whitespace in all of our files. This is known to cause trouble in a collaborative environment. See discussion at: <a

href="http://marc.theaimsgroup.com/?t=112450901100001">http://marc.theaimsgroup.com/?t=1124509011000

href="http://marc.theaimsgroup.com/?t=112495618800002">http://marc.theaimsgroup.com/?t=1124956188000 and various linked discussions.<br/>

## 13. [FOR-666] clarify the sitemap matches etc. in FAQ about non-skinned html

http://issues.apache.org/jira/browse/FOR-666

The pattern matching example is quite misleading. There should be a note where exactly to copy your

old site (in a standard seeded project) to make the pattern matching work.<br/>
<br/>
<br/>
At least for me it worked only after I used a \*\*.html directeive.<br/>
<br/>
<br/>
&lt;map:match pattern=&quot;old\_site/\*\*.html&quot;&gt;

## 14. [FOR-726] use locationmap in all of the plugins

http://issues.apache.org/jira/browse/FOR-726

Each plugin has sitemaps that need to use the locationmap.<br/> <br/> (Perhaps we need Jira sub-tasks for each plugin.)

## 15. [FOR-765] forrest war and classpath issues with Jetty

http://issues.apache.org/jira/browse/FOR-765

Until recently we could run forrest as a WAR with Jetty. With today's SVN r356945 it gets past the Cocoon startup phase, then on the first client request it suffers some error which causes a NoSuchMethodError. See attached log ... no other clues. This happens for any site, e.g. 'forrest seed-sample war'. All is okay for 'forrest seed-sample run'. This indicates a classpath issue with Jetty/Forrest configuration.

# 16. [FOR-901] Review the note on the home page about first forrest run and retrieving plugins from network

http://issues.apache.org/jira/browse/FOR-901

Review the note on the home page about first forrest run and retrieving plugins from network<br/>
<a href="http://svn.apache.org/viewvc/forrest/trunk/site-author/content/xdocs/index.xml?r1=365495&r2=365494&

# 17. [FOR-906] locationmap documentation explain this-to-that.xsl naming convention and default lm matches

http://issues.apache.org/jira/browse/FOR-906

Explain this-to-that.xsl naming convention and default locationmap matches.

### 18. [FOR-922] update all docs that explain sitemap fragments

http://issues.apache.org/jira/browse/FOR-922

There are various documents that explain parts of the sitemaps. Some of these mention pathnames, some have actual fragments of code copied from sitemaps. All of this needs to be updated to reflect the current sitemaps.<a href="mailto:current-sitemaps.cbr/>cbr/>cbr/>"> the sitemaps were recently updated to use locationmap, some sitemaps were simplified, filenames were changed, e.g. document2html.xsl to document-to-html.xsl<br/>cbr/> these changes need to be reflected in the current docs.

# 19. [FOR-936] Forrest "looses" the locale when switching pages

#### http://issues.apache.org/jira/browse/FOR-936

When moving from one page to another and switching locales in between, the chosen locale is lost when entering the new page. To reproduce: <br/> <br/> <br/> open a localized page<br/> <br/> 3) switch locale by appending '?locale=XY' in the address field<br/> <br/> open another page available in both the original locale (before the switch) and the new locale XY<br/> <br/> 5) notice how the new page is displayed in the original locale, NOT the expected XY locale<br/> <br/> <br/> Although one could argue that the described behaviour is wanted in some cases, I believe that to most users it would be natural that the locale is &quot;sticky&quot; once changed - it should not change back by itself. Thus, the &quot;sticky&quot; behaviour should be default in Forrest.<br/> <br/> <br/> The fix is simple, patch to come soon.

### 20. [FOR-537] Plugin documentation sitemap references

#### http://issues.apache.org/jira/browse/FOR-537

This one references:<br/>
&quot;FORREST\_INSTALL\_DIR/plugins/sitemap.xmap&quot;<br/>
and<br/>
&quot;src/plugins/sitemap.xmap&quot;<br/>
and<br/>
&quot;&lt;map:mount uri-prefix=&quot;&quot;<br/>

href="http://forrest.apache.org/0.7/docs/plugins/pluginInfrastructure.html#How+does+Installation+work%3F"> <br/> <br/> <br/> --tim

# 21. [FOR-671] Layering error of HTML headings breaks rest of the page w/o warning

### http://issues.apache.org/jira/browse/FOR-671

Up to revision 280144 if you make Forrest display the following file as a skinned .html-file in Forrest, you'll only see the title. Only if you fix the layering error of the headings and make h2 into h1 will the rest of the page content show.<br/>
<br/>| Str/> If Forrest minds this layering error it should at least report it as an error, shoulnd't it?<br/>
<br/>
| Str/> Str/>

encoding="ISO-8859-1"?><br/>br/> &lt;!DOCTYPE html PUBLIC &quot;-//W3C//DTD XHTML 1.0 Strict//EN&quot; &quot;<a

br/>

# 22. [FOR-731] empty linkmap.html document, side-effect of workaround to FOR-675

#### http://issues.apache.org/jira/browse/FOR-731

The main/webapp/resources/stylesheets/linkmap-to-document.xsl has a workaround for a side-effect to the of the workaround for issue <a href="https://issues.apache.org/jira/browse/FOR-675" title="upgrading to commons-jxpath-1.2.jar causes failures with linkrewriter protocols site: etc.">FOR-675</a>.

# 23. [FOR-767] Forrestbot webapp reports successful even when there are broken links

#### http://issues.apache.org/jira/browse/FOR-767

We should also report why it failed: <br/> - plugin problem<br/>- broken link (with a link to the broken links file)<br/>- ??<br/> - ??<br/>

# 24. [FOR-861] Update locationmap docs for working with remote files

#### http://issues.apache.org/jira/browse/FOR-861

The docs for retrieving content from remote locations [1] have not kept up with Tims wonderful naming conventions for the locationmap [2]<br/>
br/> <br/>
We need to update the docs to reflect the situation described in [3] (don't miss the correction in the next message)<br/>
br/> <br/>
| 1] <a href="http://forrest.apache.org/docs\_0\_80/locationmap.html#source-via-http">http://forrest.apache.org/docs\_0\_80/locationmap.html#source-via-http">http://forrest.apache.org/docs\_0\_80/locationmap.html#source-via-http">http://forrest.apache.org/docs\_0\_80/locationmap.html#source-via-http">http://forrest.apache.org/docs\_0\_80/locationmap.html#source-via-http">http://forrest.apache.org/docs\_0\_80/locationmap.html#source-via-http">http://forrest.apache.org/docs\_0\_80/locationmap.html#source-via-http">http://forrest.apache.org/docs\_0\_80/locationmap.html#source-via-http">http://forrest.apache.org/docs\_0\_80/locationmap.html#source-via-http">http://forrest.apache.org/docs\_0\_80/locationmap.html#source-via-http">http://forrest.apache.org/docs\_0\_80/locationmap.html#source-via-http">http://forrest.apache.org/docs\_0\_80/locationmap.html#source-via-http">http://forrest.apache.org/docs\_0\_80/locationmap.html#source-via-http">http://forrest.apache.org/docs\_0\_80/locationmap.html#source-via-http">http://forrest.apache.org/docs\_0\_80/locationmap.html#source-via-http">http://forrest.apache.org/docs\_0\_80/locationmap.html#source-via-http">http://forrest.apache.org/docs\_0\_80/locationmap.html#source-via-http">http://forrest.apache.org/docs\_0\_80/locationmap.html#source-via-http">http://forrest.apache.org/docs\_0\_80/locationmap.html#source-via-http://forrest.apache.org/docs\_0\_80/locationmap.html#source-via-http://forrest.apache.org/docs\_0\_80/locationmap.html#source-via-http://forrest.apache.org/docs\_0\_80/locationmap.html#source-via-http://forrest.apache.org/docs\_0\_80/locationmap.html#source-via-http://forrest.apache.org/docs\_0\_80/locationmap.html#source-via-http://forrest.apache.org/docs\_0\_80/locationmap.html#source-via-http://forrest.apache.org/docs\_0\_80/l

# 25. [FOR-635] images not reproduced in PDFs, if sources are in xdocs/images directory

### http://issues.apache.org/jira/browse/FOR-635

We used to enable images to be placed in the xdocs/images directory. However, now they are intended to go in the resources/images directory instead. Both methods will work for html pages, but only the latter method for the PDF pages.
