## **Forrest DTD documentation**

We use the <u>NekoDTD</u> (http://www.apache.org/~andyc/neko/doc/dtd/index.html) tool packaged as a Cocoon Generator to generate automagically some hyperlinked DTD references. Note that these references do not reflect the modularity of our DTDs, they are primarily "user-oriented help" documentation.

The actual DTDs are located in the Forrest distribution at src/core/context/resources/schema/
