Issues for this release

Table of contents

1. [FOR-470] docs and fresh-site samples for "raw content" need update

http://issues.cocoondev.org//browse/FOR-470

The documentation about "raw content" describes the method used prior to version 0.7 <br> so we need to update docs and the fresh-site samples.
 faq.html and upgrading_07.html and elsewhere.

2. [FOR-465] Logging Error: Writing event to closed stream.

http://issues.cocoondev.org//browse/FOR-465

After doing 'forrest' there is a strange error message at the end of Cocoon's run:
 "Logging Error: Writing event to closed stream." This happens on every different project that i have tried.

3. [FOR-454] add content about major changes for this release

http://issues.cocoondev.org//browse/FOR-454

We need notes about the major changes for this release: <br> upgrading_07.xml <br> announcement-0.7.txt
 RELEASE-NOTES-0.7.txt

4. [FOR-391] website docs/site split

http://issues.cocoondev.org//browse/FOR-391

Split our website into a standalone documentation site (which will be maintained per version/branch) and the main version-independent site.

5. [FOR-259] openoffice files can skip sections

http://issues.cocoondev.org//browse/FOR-259

Create an openoffice file with lines like this:

 Heading 2
 Heading 3
 Heading 4
 Heading 9
 Heading 2

 The last two lines are not translated into sections.

6. [FOR-241] character entities (e.g. ampersand) are expanded again for href or src attributes

http://issues.cocoondev.org//browse/FOR-241

If I have a url like this inside the XML source:

 http://sourceforge.net/sflogo.php?g

 validate-xdocs fails because it wants the literal & to be typed out as
 &amp;
instead. So I correct it to become:

 <a
href="http://sourceforge.net/sflogo.php?group_id=comics-grabber&type=1">http://sourceforge.net/sflogo.p

 However, the generated HTML has the entity resolution UNDONE!:

 <a
href="http://sourceforge.net/sflogo.php?group_id=comics-grabber&type=1">http://sourceforge.net/sflogo.php?g

 This HTML fails validation as 4.01 transitional.

 David Crossley adds:
There is a demonstration of the problem in the document
src/documentation/content/xdocs/docs/dreams.xml
 The ampersand in the link element text is
properly handled but <br> the ampersand in the link href attribute is not.

7. [FOR-229] SVG not converted to PNG

http://issues.cocoondev.org//browse/FOR-229

See <a
href="http://mail-archives.apache.org/eyebrowse/BrowseList?listName=dev@forrest.apache.org&by=thread&fr

8. [FOR-227] static html site: index.html missing in links

http://issues.cocoondev.org//browse/FOR-227

When creating a static html site (running command "forrest")
 links in the document
that point to a directory (index.html)
 are broken when using the site without a server (<a
href="file://">file://)

 To fix: add the filename to the links, i.e.
 create <a
href="../chapter1/index.html">
 instead of <a
href="../chapter1/">
