Information about Apache org.apache.forrest.plugin.input.projectInfo

Apache org.apache.forrest.plugin.input.projectInfo

This plugin extends Apache Forrest to generate project info from various configuration files. Current features include a project details page (lists important information such as mailing list addresses), recent changes, todo list and release notes.

Summary

Project Website	http://forrest.apache.org/plugins/org.apache.forrest.plugin.input.projectInfo
